- ✓ Engineered from Pure Virgin Wood Fiber
- ✓ Next Day Delivery Available Across Ontario and Quebec
- ✓ A 100% “Made in Canada” Product

Your Playground Team

FIBERTOP is Playcare’s surfacing solution for new and retrofitted playgrounds. It is a “made in Canada” engineered impact surfacing system. Our specially processed, virgin wood grindings in combination with our high performance drainage layer, exclusive wear mats and flexible edging complete the “Fibertop System”. See www.fibertop.ca for complete system details.

FIBERTOP is IPEMA certified to ASTM F2075 and ASTM F1292 (complies with CAN/CSA Z614) and provides the following benefits:

- **High Impact Attenuation** - Consistently provides superior test results over competitive products.
- **Accessibility** - Tested by TUV SUD America Inc. to be compliant with ASTM F1951 Standard for Playground Surface Accessibility.
- **Cost Effective** - Inch per inch, Fibertop provides the highest fall impact attenuation at the least cost verses any accessible, IPEMA certified competitive product.
- **Easy Installation** - Do it yourself, have it applied by a pneumatic blower truck or let one of our installation crews do it for you.
- **Enhanced Aesthetics** - Fibertop is an attractive, natural looking product. Let us beautify your play space.

Introducing Our Exclusive **Fibertop® Wear Mat** for placement under swings, slides and fall zones.

- Reduces maintenance and helps ensure long term compliance
- IPEMA certified when installed with 12” of compacted Fibertop® engineered wood fiber
- Free shipping when purchased with Fibertop® engineered wood fiber
- Available with optional anchoring kit

- 48” x 48” x 2.5”
(122 cm x 122 cm x 6.4 cm)
- Weight approx. 70 lbs
(32 kgs)
- Beveled edge
